

## HEP B 1 GALL STONE

### GROSS

Gallbladder bigger in size and presence of gallstone

### SALIENT FEATURES:

- The gallbladder is **dissected out along with the liver**. Any pathology or stone formation inside it is noted.
- A gall bladder distended **with stones may rupture** spontaneously.
- The **extravasation of bile** into the peritoneal sac may cause peritoneal irritation and infection.
- Autolysis leads to discoloration of gallbladder and liver.
- **In Starvation** Gallbladder bigger in size and **distended with bile**
- Bile may be required for analysis, presence of **chlorpromazine and morphine**.

The gall bladder **resists putrefaction** for a long time
